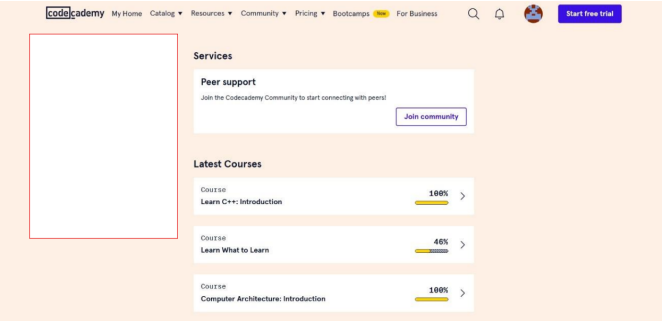
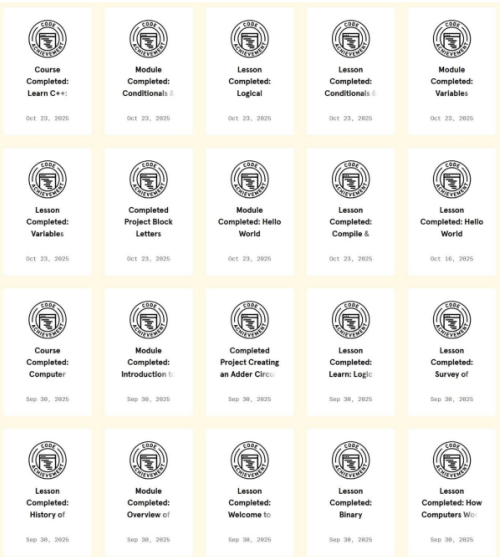
SITE 1101: Homework Instructions

Codecademy courses will be supplementary to your education and will help you to understand relevant topics step by step. You are required to pass only **free** lessons, modules, etc. Your **overall grade** will be based on your course progress percentage. To be eligible for a grade, make sure that your Codecademy profile is **public** and your submitted **Profile Link** is correct. If you have passed the course previously, you must **reset your progress** and pass the course again. Not having complete **screenshots** of your Profile page and Achievement Page with badges in your submission will result in a 20% penalty (see examples).





Please **remove the instructions above** and fill in and submit the table below with screenshots as **a single PDF** file.

Full Name	
Student ID	
CRN	
Full Codecademy Course Link	
Full Codecademy Profile Link	
Is your profile public? (Update your account settings and access your profile from a different account)	
Are your links correct? Double check it.	
Did you include both of the screenshots within this document?	
Is this the only file you are submitting? (It should be)
